## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-20, drawn to a non vision impairing marked contact lens.

Group 2, claim(s) 21-54, drawn to a method for evaluating the position of a marked contact lens in a patient's eye.

Group 3, claim(s) 55-64, drawn to a method for determining pupil parameters.

2. The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The individual inventions recite mutually exclusive subject matter that are not related in such a way that one search could determine patentability. Additionally the subject matter in question would require separate classification searches in US class/subclass combinations.

Due to the complex nature of the restriction requirement no phone call was made to the applicant in order to elect.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2873

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
